[COMPANY]'s Rev5 listing has to meet new FedRAMP changes

Mar 7, 2027

Grace period ends, or the listing is revoked.

WHAT CHANGES, WHEN

Dec 7, 2026	VDR and VER apply. Existing certifications must adopt or have a corrective action plan.	MANDATORY
Jan 1, 2027	Most CR26 rulesets apply, each with its own grace period for existing certifications.	DEADLINE
Mar 7, 2027	VDR/VER grace period ends.	REVOCATION
Through 2027	Continuous monitoring, CPO and SDR phase in for active certifications.	PHASE-IN

FedRAMP is changing. Your listing has to change with it.

The authorization stands. The evidence behind it becomes machine-readable and continuous.

Why [COMPANY], why now

[COMPANY]'s active [LISTED OFFERING] certification, framed against the 2026 Consolidated Rules, and where Boundera fits.

THE CASE IN FOUR PARTS

01 Who is [COMPANY]?

- [COMPANY] is a [COMPANY DESCRIPTOR] serving [FEDERAL FOOTPRINT].
- Active FedRAMP listing: [LISTED OFFERING], [IMPACT LEVEL].

02 What CR26 changes?

- The document-and-scan model retires in favor of machine-readable evidence.
- Teams need maintained, machine-readable records backed by current implementation evidence.

03 Why act now?

- Three dates land inside 15 months, starting with VDR and VER in December 2026.
- Federal customers depend on an uninterrupted authorization.
- A listing that misses the rules is revoked with public notice.

04 Why Boundera?

- Bring supported SSP content into reviewable records and prepare your SDR with linked evidence.
- Meet the VDR and VER deadlines with agent-assisted workflows, vulnerability report included.
- Keep evidence and reporting current after adoption.

What Boundera brings to your FedRAMP program

Connect your security tools, manage vulnerability response, and maintain the records your agencies and assessors need.

01	**Connected evidence**	Bring findings, asset context and supporting evidence together from supported cloud, scanner, identity and development integrations. Build on the tools your team already uses.
02	**Vulnerability evaluation and response**	Evaluate findings individually or in batches using reachability, exploitability and agency impact. Maintain response plans, deadlines, remediation evidence and decision history.
03	**Your SSP, carried forward**	Import supported SSP narratives and parameters into reviewable control records. Inspect the source behind each proposal, approve what carries forward, and resolve gaps as you prepare your Security Decision Record.
04	**AI-assisted compliance work**	Use Boundera's AI to investigate evidence, identify missing context and draft rule-specific validation procedures and remediation guidance for your team to review.
05	**Certification reporting**	Generate your Security Decision Record and Certification Package Overview in JSON and human-readable formats. Export vulnerability, ongoing certification, significant change and incident reports from maintained records.
06	**Controlled sharing and assessor collaboration**	Share packages and evidence through an access-controlled Trust Center. Manage evidence requests, assessor feedback, package versions and access history.
07	**A foundation for FedRAMP 20x**	Add KSI evidence collection, recurring validation and prioritized gap remediation as your team prepares for 20x. Keep validation results and supporting evidence connected over time.
	DEPLOYMENT	Available through Boundera Cloud or self-deployed within your boundary. Capabilities and integrations depend on your selected scope and deployment.

NEXT STEP

Book a 30-minute CR26 readiness review

We walk your team through exactly what changes for the listing, next steps to make sure you hit the deadlines.
