[COMPANY]'s Rev5 listing has to meet new FedRAMP changes

Mar 7, 2027

Grace period ends, or the listing is revoked

WHAT CHANGES, WHEN

Dec 7, 2026

VDR and VER become mandatory for every active certification

MANDATORY

Jan 1, 2027

Consolidated Rules deadline: most CR26 rulesets apply to the listing

DEADLINE

Mar 7, 2027

VDR/VER grace period ends: a certification not following the rules is revoked with public notice

REVOCATION

Through 2027

Continuous monitoring, CPO and SDR phase in for active certifications

PHASE-IN

FedRAMP is changing. Your listing has to change with it.

The authorization stands. The evidence behind it becomes machine-readable and continuous.

Why [COMPANY], why now

[COMPANY]'s active [LISTED OFFERING] certification, framed against the 2026 Consolidated Rules, and where Boundera fits.

THE CASE IN FOUR PARTS

Who is [COMPANY]?

- [COMPANY] is a [COMPANY DESCRIPTOR] serving [FEDERAL FOOTPRINT].
- Active FedRAMP listing: [LISTED OFFERING], [IMPACT LEVEL].

What CR26 changes?

- The document-and-scan model retires in favor of machine-readable evidence.
- Manual, consultant-heavy compliance will not meet the new cadence or format.

Why act now?

- Three dates land inside 15 months, starting with VDR and VER in December 2026.
- Federal customers depend on an uninterrupted authorization.
- A listing that misses the rules is revoked with public notice.

Why Boundera?

- Turns your existing work and SSP into an SDR that meets the new requirements.
- Meet the VDR and VER deadlines with agent-assisted workflows, vulnerability report included.
- Stay compliant after the deadline: continuous evidence keeps the package current.

NEXT STEP

Book a 30-minute CR26 readiness review

We walk your team through exactly what changes for the listing, next steps to make sure you hit the deadlines.
